DINO WATCH IMPOSES ITSELF WITH STYLE AND ORIGINALITY ON THE WATCH MARKET

Watches and accessories brand GTO has developed a collection named Dino. Declined into three varied models, all of them are designed with elegance and originality.

DINO: A STYLISH GEOMETRY

Dino models distinguish themselves to other watches thanks to the originality of their case shape, which is squared and curved at the same time. Considered as the most fashion model of GTO collection, this seductive watch proposes a declination of several colors into three models: classic Dino GT, attractive Dino Gold and sparkling Dino Exclusive. This complete range gives a wide choice to find the style which is the most suitable for anyone.

A WATCH AS WELL ELEGANTE AS PRACTICAL

If some models of Dino collection offer chic and sober colors, others are more colored and eccentrics.

Whatever the chosen model, the ostrich leather style strap perfectly matches with the color of the watch.

Dino models and its imposing diameter of 50 mm have technical functions such as chronograph with rattrapante hand, GMT 24 hours and date.

A BRAND BETWEEN TRADITION AND PASSION

GTO three letters, representing the new watches and accessories brand created by its founder Philippe Gaso, motorsport enthusiast and founder of the Group Flip Technology, specialized for more than 30 years in mandatory on-board instrumentation for motor vehicles.

GTO "Watches and Accessories" was inspired by a line of legendary cars by mixing with success tradition and passion.
