WARM UP WATCH : CREATED WITH PRECISION FOR COMPETITION

The new watches and accessories brand GTO has designed with precision and specificity Warm Up model. Dedicated to all motorsport fans.

LIVE THE RACE AS IF YOU WERE THERE

The Warm Up is the model designed by GTO to adapt itself perfectly to the motorsport.

With refined features combined to a sport and fashion look, the Warm Up watch clearly reflects a timepiece which gives to its owner a real sensation of handling a chronograph for a screening at the heart of the race.

THE WATCH FOR MOTORSPORT COMPETITION

Warm up model by GTO can manage time before and during the race thanks to its very specific and technical characteristics.

Warm Up watch presents a patented rotating bezel with indicators dedicated to pilots and his technical staff to support them throughout the competition without wasting time.

WARM UP: THROUGHOUT SPORTS

Warm Up model integrates three dials: alarm function, chronograph 60 mn and 60 sec with rattrapante hand. The usual seconds hand has been replaced to work only when the chronograph is engaged. As for its leather strap, it also reminds the interior of the finest sports cars.

Warm Up presents other characteristics such as speed calculation in km/h – miles/h with an instant-read.

This model is considered as a full-fledged chronograph watch, while keeping a fashion aesthetic such as its carbon effect case.

A BRAND BETWEEN TRADITION AND PASSION

GTO three letters, representing the new watch and accessory brand created by its founder Philippe Gaso, motorsport enthusiast and founder of the Group Flip Technology, specialized for more than 30 years in mandatory on-board instrumentation for motor vehicles.

GTO “Watches and Accessories” was inspired by a line of legendary cars by mixing with success tradition and passion.
